Journal of Contemporary Medical Practice (JCMP)

Aims and Scope

Introduce the new peer-reviewed, open access journal entitled *Journal of Contemporary Medical Practice (JCMP)* is an open access, peer-reviewed international journal that deals with both applied and theoretical issues. Special Issues devoted to important topics in social science will occasionally be published. The main objective is to offer an intellectual platform to the international scholars and it aims to promote interdisciplinary studies in social science.

All manuscripts must be prepared in English and are subject to a rigorous and fair peer-review process. The journal publishes original papers including but not limited to the following fields:

- Biomedical optics
- Clinical trials, outcomes research
- Diagnostic physics and its applications
- Education and training in medical physics
- Genetics and tissue engineering
- Hadron-therapy
- Measuring systems, digital signal processing,
- Medical instrumentation.
- Medical imaging
- Molecular imaging
- New technologies development and applications
- Nuclear medicine
- Professional issues in medical physics
- Radiation detection, protection, shielding
- Radiation dosimetry and metrology
- Radiation Oncology
- Radiobiology
- Radiotherapy physics and its applications
- Therapies (non-ionising radiation)

We are also interested in: 1) Short Reports - 2-5 page papers where an author can present either preliminary data or an idea with theoretical background but has not yet completed the research needed for a complete paper; 2) Book Reviews - Comments and critiques.
