

# Research on the Establishment of Party Building Demonstration and Quality Improvement in Aerospace Vocational Colleges in the New Era

Mengqi Zheng

Jiujiang Polytechnic University of Science and Technology, Jiangxi, China

**Abstract:** *This article aims to explore the path and strategies for the establishment of party building demonstration and quality improvement in aerospace vocational colleges under the background of the new era. Based on the overall requirements of Party building in the new era, this paper analyzes the current situation and challenges of Party building work in aerospace vocational colleges, and combines the cases of Party building at Beihang University and Soochow University to propose specific demonstration and quality improvement measures such as strengthening political leadership, improving institutional mechanisms, innovating work methods, strengthening team building and Party member education, emphasizing demonstration guidance and career development, in order to enhance the overall level of Party building work in aerospace vocational colleges.*

**Keywords:** New Era, Aerospace vocational colleges, Party building demonstration creation, Quality creation excellence.

## 1. Introduction

### 1.1 Background

In the context of the new era, General Secretary Xi Jinping has made a series of important statements on party building in universities. High quality party building leading the high-quality development of university undertakings is the only way to comprehensively build high-level universities, the key to cultivating high-quality talents, and the necessary obligation to implement the overall requirements of party building in the new era. As an important battlefield for talent cultivation, scientific research, social services, and cultural inheritance and innovation, universities should strengthen and improve their party building work, especially deepen the demonstration and quality creation of party building, and provide strong political guarantees for the high-quality development of aerospace vocational colleges.

As an important guarantee for the development of schools, party building work must constantly innovate and optimize to meet the requirements of the times. On the one hand, the party building work in universities is of great significance in promoting the comprehensive development of universities; On the other hand, with the expansion of the scale and improvement of the level of higher education, the party building work in universities is also facing more complex environments and more arduous tasks.

As an important base for cultivating aerospace talents, the importance of party building work in aerospace vocational colleges is self-evident. Carrying out party building demonstration and quality improvement work aims to enhance the level of party building work in aerospace vocational colleges, promote high-quality development of the school, provide strong political and organizational support for the school, enhance the cohesion of university party organizations, and cultivate more high-quality and excellent talents for the national aerospace industry.

### 1.2 Significance

Deepening the demonstration and quality creation of party building in universities in the new era is an important measure to implement the Party's education policy and strengthen the Party's comprehensive leadership over universities. It is conducive to promoting the better performance and role of university party organizations, enhancing the scientific, institutionalized, and standardized level of university party building work, providing strong political and organizational guarantees for the development of various undertakings in universities, and is an inevitable requirement for modernizing the governance system and governance capacity of universities. It is conducive to further improving the quality and level of party building work in universities, and promoting greater achievements in talent cultivation, scientific research, and social services in aerospace vocational colleges.

In terms of party building in universities, Yang Duo proposed to establish a cooperative development and education mechanism between party building and education in universities, expand the service audience and education path of party building in universities, improve the diversified collaborative development system of party building in universities, and promote the integration of high-quality development of higher education [1]. Sun Xiangjun focuses on four aspects: "Party building+disciplines", "Party building+academia", "Party building+scholars", "Party building+students", and implements the practice path of high-quality development in universities [2]. Zhou Liangshu and Yang Difu believe that it is necessary to adhere to and improve the principal responsibility system under the leadership of the Party committee, strengthen ideological and political work in universities, enhance the construction of grassroots Party organizations in universities, and strengthen Party building in universities to ensure the development of universities. By adhering to the socialist direction of education, promoting universities to serve social development,

and taking the path of high-quality development of higher education with Chinese characteristics, we can promote the deep integration of Party building and high-quality development of higher education in universities [3].

In the field of party building in aerospace vocational colleges, Zhou Xingfeng and Chen Ailing analyzed the current situation of party building work among students in maritime vocational colleges in the era of new media, and proposed innovative models such as the “three-level training” program for active party applicants and the “five combination” education for student party building work, which have been applied in practice [4]. Zhang Xiangchun and Rong Jing analyzed the reasons for the problems in the construction of student party branches in vocational colleges, and proposed to innovate the form of party branch setting and build party branches in majors; Improve the system of party affairs work and promote the standardized construction of party branches; Intensify training, communication, and assessment efforts, and improve the level of party affairs work; Expand the channels for educating student party members to improve the effectiveness of student party building work [5].

Ji Haiqun and Yang Bo proposed to enhance the leading role of political construction through the “big system view” thinking of aerospace; Consolidate the fundamental role of ideological construction with the value of the aerospace “spiritual lineage”; Strengthening the combat fortress role of organizational construction through the mechanism of “two-way integration” in aerospace; The guarantee role of promoting work style and discipline construction through the “dual zeroing” method in aerospace [6].

With the advent of the new era, aerospace vocational colleges are playing an increasingly important role in cultivating high-quality aerospace talents and promoting aerospace technology innovation. The establishment of party building demonstration and quality improvement is an important means to enhance the level of party building work in universities and promote high-quality development of universities. It is of particular significance for aerospace vocational colleges. Through the demonstration of party building and quality creation, the quality of party building work in aerospace vocational colleges can be further improved, the cohesion and combat effectiveness of party organizations can be enhanced, and a strong political guarantee can be provided for cultivating more outstanding aerospace talents.

## 2. Current Situation and Problems

The establishment of party building demonstration refers to the formation of a group of party organizations and party member groups with exemplary and leading roles through the establishment of typical examples and the promotion of experience. Quality excellence refers to the pursuit of excellence and emphasis on practical results in party building work, continuously improving the quality and level of party building work. In aerospace vocational colleges, the establishment of party building demonstration and quality improvement should be closely integrated with the characteristics of the school, highlighting aerospace features and emphasizing practical innovation.

In recent years, the party building work of aerospace vocational schools has achieved certain results, and model colleges, benchmark departments, and model branches for party building work have emerged. These units actively explore and innovate in party building work, forming many experiences and practices that can be referenced and promoted, but there are still some problems and shortcomings. For example, in some schools, there is a phenomenon of “two skins” between party building work and business work, with uneven quality of party building and insufficient demonstration effect. Some university party organizations do not attach enough importance to party building work, resulting in a lack of systematic and standardized party building work. The integration of party building work with business work is not close enough, and there is a phenomenon of “emphasizing business and neglecting party building”. The innovation level of party building work in some universities is insufficient. Some university party organizations have weak links in party member education, management, and services; The insufficient role played in promoting the development of school undertakings has constrained the further development and improvement of school party building work.

With the advent of the new era, the environment, tasks, and requirements of party building work have undergone profound changes. How to adapt to these changes and innovate the ways and methods of party building work has become an important issue that aerospace vocational colleges need to address.

## 3. Cases and Implications

### 3.1 Case Study

At present, vocational colleges in the aerospace industry have achieved certain results in party building demonstration and quality improvement. For example, some universities have established a relatively complete system of party building work, formed party building brands with aerospace characteristics, and cultivated a group of excellent party cadres and party members.

Taking Beihang University as an example, the university has achieved significant results in party building demonstration and quality improvement. The school party committee attaches great importance to party building work, has formulated a scientific plan for party building work, and established a sound responsibility system for party building work. At the same time, the school focuses on innovating the ways and methods of party building work, such as using modern information technology to improve the efficiency and effectiveness of party building work. In terms of party building demonstration creation, the school has emerged a group of excellent grassroots party organizations and individual party members, such as the Party Committee of the Aerospace College being selected as the fourth batch of “National Party Building Work Benchmark Departments”, and the teacher party branch of the Aviation Propulsion Department of the Energy and Power Engineering College being selected as the fourth batch of “National Party Building Work Model Branches”. The emergence of these outstanding examples not only enhances the level of party building work in schools, but also provides useful reference and guidance for

other universities.

Taking Suzhou University as an example, as the first training and creation unit of the national party building work demonstration university in Jiangsu Province, the school attaches great importance to party building work and has promoted the in-depth development of party building work through a series of innovative measures. For example, the school held the May Fourth Commendation Conference and Special Youth League Day activities, held the Conference on Comprehensive Strict Governance of the Party, and strengthened the ideological and political education and party spirit education of teachers and students. At the same time, the school also emphasizes the role of grassroots party organizations as fighting fortresses, and enhances the cohesion and combat effectiveness of grassroots party organizations through improving organizational systems and strengthening institutional construction.

The school has always regarded demonstration creation as a powerful driving force for building a world-class university with Chinese characteristics. The school party committee continuously improves the quality and level of party building work through measures such as strengthening organizational leadership, innovating work models, enhancing party member education, and promoting career development. At the same time, the school actively explores innovative practices such as the “123 line network” working mechanism, providing new ideas and references for the party building work in universities.

### 3.2 Inspiration

From the cases of Beihang University and Soochow University, it can be seen that deepening the creation and quality improvement of party building demonstrations in universities in the new era requires university party organizations to continuously strengthen their own construction. The establishment of party building demonstrations and quality improvement in universities in the new era requires university party organizations to innovate their work models, strengthen party member education, and promote career development. At the same time, it is also necessary to focus on summarizing experience, condensing methods, forming characteristics, and building brands.

## 4. Paths and Measures for Deepening Work

In the future, aerospace vocational colleges should continue to strengthen the demonstration and quality creation of party building work, and continuously improve the level of party building work. Suggestions are as follows:

### 4.1 Taking Party Building as the Core and Strengthening Political Leadership

The party building work in universities should always adhere to the leadership of the party's political construction, and put the political development of the party in the first place. Adhere to the comprehensive leadership of the Party and ensure that the development direction of the school is consistent with the Party's line, principles, and policies. Give full play to the leading core role of party organizations in the

development of schools, effectively strengthen the leadership of party building work, clarify the responsibilities of party building work, strengthen the construction of party building work teams, establish and improve the responsibility system and assessment mechanism for party building work.

By strengthening the study of the Party's political theory and conducting political education, we aim to enhance the guidance of ideological and political education, worldview, outlook on life, and values for teachers and students, and improve the political consciousness and ability of Party members and cadres in universities. Give full play to the exemplary role of Party members and lead teachers, students, and staff to actively participate in the development of the school. By holding lectures, seminars and other forms, enhance the political awareness, overall awareness, core awareness, and alignment awareness of teachers and students.

### 4.2 Improve Institutional Mechanisms

Improve the system and mechanism of party building work to ensure the standardization and institutionalization of party building work. Including improving the responsibility system and assessment mechanism for party building work, strengthening the assessment and evaluation of party building work, formulating party building work standards and assessment systems that are in line with the characteristics of aerospace majors, quantitatively assessing and evaluating party building work, and improving the quality and effectiveness of party building work. At the same time, we need to promote the deep integration of party building work and business work in universities, and achieve a “dual wheel drive”.

Focusing on quality improvement, standardizing work processes, and enhancing the level of party building work. Establish and improve the system of party building work, including the rules of procedure for party organizations, the system for educating and managing party members, and the system for building party conduct and clean governance. By improving institutional construction, ensuring the standardization and institutionalization of party building activities, and enhancing the quality of party building activities.

### 4.3 Innovate Work Methods and Enhance Work Effectiveness

Explore the establishment of an education model of “Party building+aerospace”, integrating the advanced concepts and organizational advantages of the Party into the talent cultivation, curriculum design, and internship training of maritime majors, to enhance students' comprehensive quality and professional competence. By guiding and supporting the development of aerospace majors through party building work, such as closely integrating party building work with scientific research, talent cultivation, and other work, a “dual chain” model is formed.

Breaking away from traditional forms of party building activities and combining with the characteristics of maritime majors, we will carry out diverse and rich content party building activities, such as maritime knowledge competitions,

party member volunteer services, party member demonstration posts, etc., to drive the infectiousness of party building work.

Utilize modern information technology to enhance work efficiency. Pay attention to the use of the Internet, big data and other modern information technology means, such as the establishment of online party branches, online learning, etc., to improve the intelligence and accuracy of party building, and improve the efficiency and coverage of party building. Establish a party building website, WeChat official account, etc., and create a platform for party building activities that combines online and offline, so as to facilitate party members to participate in party building activities and learn and communicate anytime and anywhere.

#### 4.4 Strengthening Team Building and Party Member Education

We attach great importance to the construction of the party building work team in universities, and select party members and cadres with high political quality and strong professional ability to hold important positions in party building work. At the same time, it is necessary to strengthen the training and education of the party building work team, pay attention to the main role of university teachers and students, regularly carry out rich and colorful party building activities such as party member training, learning and exchange, stimulate the internal vitality of party building work, enhance the cohesion and centripetal force of party organizations, improve their comprehensive quality and work ability, strengthen supervision and management of party members, and give full play to the exemplary role of party members.

#### 4.5 Emphasize Demonstration Leadership and Career Development

By creating exemplary universities, benchmark departments, and model branches for party building, we can play a leading role and promote the overall improvement of party building work in universities. At the same time, it is necessary to strengthen guidance and support for demonstration units to ensure the effectiveness of demonstration creation work.

Emphasis should be placed on building a party building brand with aerospace characteristics, such as conducting themed education activities on "Aerospace Spirit" and establishing a platform for showcasing "Aerospace Culture". Deeply explore the highlights and characteristics of school party building work, form a unique party building brand and culture, and promote the deep integration of party building work and business work.

University party organizations should closely focus on the overall development of the school's cause and play the leading core role of the party organization. Actively participate in the decision-making and management of major issues in the school, and promote the healthy development of various undertakings in the school; To strengthen the connection and communication with teachers and students, understand their needs and demands, and improve the quality of education and teaching; We need to strengthen our connections and cooperation with other party organizations

such as universities, social enterprises, and institutions, achieve resource sharing and complementary advantages, and promote the deep integration and common development of schools and society.

### 5. Conclusion and Prospect

The establishment of party building demonstration and quality improvement in aerospace vocational colleges in the new era is a long-term and arduous task. By strengthening ideological guidance with Party building as the core, improving institutional mechanisms, innovating Party building work methods, enhancing team building and Party member education, and emphasizing demonstration guidance and career development, the quality and level of Party building work in universities can be continuously improved. University party organizations should continue to strengthen innovation and practical exploration in party building work, continuously improve the scientific, institutionalized, and standardized level of party building work, and provide strong political guarantees for promoting the high-quality development of aerospace vocational colleges. At the same time, it is necessary to strengthen communication and cooperation with other party organizations such as universities, enterprises and institutions, and jointly promote the party building work in universities to a new level. Looking ahead to the future, with the continuous development of the aerospace industry and the deepening of party building work in universities, the demonstration and quality improvement of party building in aerospace vocational colleges will achieve more significant results.
