

Understanding the Impact of Digital Marketing on Consumer Buying Behaviour: Hyderabad E-commerce Portal Study

Purushottam Chaudhari

Research Scholar, Department of Business Management, Osmania University

Abstract: *This study explores the profound influence of digital marketing on consumer buying behavior within the context of e-commerce portals in Hyderabad, India. In the digital age, marketing strategies have evolved significantly, leveraging online platforms to reach a broader audience and engage consumers more effectively. This research investigates how various digital marketing techniques, such as social media marketing, email campaigns, search engine optimization (SEO), and personalized advertisements, impact consumer decision-making processes and purchasing patterns. The methodology involves a mixed-method approach, combining quantitative surveys and qualitative interviews to gather comprehensive insights from a diverse demographic of e-commerce users in Hyderabad. Key findings reveal that targeted digital marketing efforts not only enhance consumer awareness and engagement but also significantly influence their purchase intentions and loyalty. The study also highlights the importance of personalized marketing in building customer trust and fostering long-term relationships. By analyzing consumer responses and behaviors, this research provides valuable recommendations for e-commerce businesses aiming to optimize their digital marketing strategies. The findings underscore the need for continuous innovation and adaptation in digital marketing practices to meet the ever-evolving preferences and expectations of online consumers. This study contributes to the growing body of knowledge on digital marketing's role in shaping consumer behavior and offers practical implications for marketers in the e-commerce sector.*

Keywords: Digital Marketing, Consumer Buying Behavior, Email Campaigns and Purchase Intentions

1. Introduction

In the contemporary digital era, the landscape of marketing has undergone a transformative evolution, significantly influencing consumer behavior and business operations. Digital marketing, encompassing a wide range of online strategies and techniques, has become a cornerstone for businesses aiming to connect with their target audiences in more personalized and impactful ways. This study, titled "Understanding the Impact of Digital Marketing on Consumer Buying Behavior: A Study of E-commerce Portals in Hyderabad, India," delves into the intricate relationship between digital marketing efforts and consumer purchasing decisions within the burgeoning e-commerce sector of Hyderabad. This research aims to provide a comprehensive understanding of how these digital marketing strategies influence consumer behavior in the context of e-commerce. By examining the effects of targeted marketing campaigns, the study seeks to uncover the factors that drive consumer awareness, engagement, and loyalty. It also explores the psychological and emotional responses of consumers to different digital marketing stimuli, shedding light on the underlying mechanisms that guide their purchase decisions.

2. Review of Literature

Al Azzam & et. al (2021) found interesting. They discovered four separate traits positively influence student's choices when buying. Out of all the digital marketing techniques they looked at, targeting stands out as the most crucial element in these decisions. Now, if we dive a bit deeper, the assessment stage actually has the biggest effect on what students decide to buy. Why is that? Well, it's because they often check out channels that cater to users who are already searching for a product. These users usually know about the

item and just want more info to weigh their options before finalizing their choice. On another note, it turns out email marketing isn't super effective for students when it comes to making purchases through digital channels.

Dr. P. Ganpathi & team (2021) say that digitalization has really boosted how people behave as consumers. You can see this change the most in busy cities and among couples who work. Since they have less, it's just to shop & pay & wherever they want. Plus shoppers get cool perks like coupons, gift cards, discounts, cash back, and price cuts when they choose digital payments. This encourages them! In this world, it's important to connect all through a digital platform.

Mukund V. Kaushik (2021) highlights that social media like YouTube &, along with fun strategies like video ads, flashy banners, and blogs, have a big impact on what customers decide to. Social media marketing has really changed how people shop online; it's a key part of digital marketing. Nowadays, shoppers are more aware of these marketing methods and tend to look for product info while deciding what to buy. Overall, we can say that digital marketing makes shopping experience a lot better. So businesses can use this info to draw customers and keep them happy.

Heri Enlangga & colleagues (2020) found out that social media marketing strongly influences how small businesses make sales. There's a positive connection between social media strategies and the purchasing choices for business products. Researchers think that after engaging with E-commerce factors, the decision to buy could drop quite a bit. At the same time, they're looking at other traits or factors that might have a stronger or weaker influence on purchasing choices for future reference. They believe more businesses will want to understand their customers better &

come up with creative ideas to improve product design for increased sales.

Mathew Johnson (2020) points out that the coronavirus has made quite an impact on our history. Marketers really need to think about just how many these changes will shape things moving forward. We're starting to see the virus's effects on different industries but there's curiosity about how today's creative marketers will adapt. One thing is certain: every business needs to prioritize digital solutions in their game plan.

Nikhil Monga (2020) concluded that social commerce could become more appealing to young people by using clever strategies: first off, the ads' message or theme should resonate well with them so it sticks in their minds! The celebrity featured should be appealing & have a good image that young folks admire. Lastly, the message should be straightforward but also grab their attention in fun ways.

Mrs. Vijaya S. Bhosale (2020) shared that social media plays an essential role in growing digital marketing efforts. Young people today prefer shopping online as it has changed their buying habits considerably. They're increasingly turning to E-commerce sites for both shopping & ordering things conveniently.

Need for the Study

Digital Marketing has brought amazing changes in the way in which the marketer markets the product and the way in which the customers are purchasing the same. Purchasing behaviour of an individual influences many factors, and these factors invariably affects the marketer to match the needs of the customers in general and youth in particular. So it is realized that there is a need to study Digital Marketing and its effect on purchasing behavior of the Consumer and Customer.

Objectives

- To study the role and effectiveness of digital marketing.
- To explore the influence of digital marketing on consumer behavior.

3. Research Methodology

Research design

This study applied descriptive and analytical research design as a quantitative research method.

Sources of Data

For the present research use both primary and secondary data. Primary data is collected through the questionnaire. Such secondary sources are drawn from the published articles, research papers, published general reports, sources through related websites etc.

Sample Design

The present study is the research oriented study. Researchers use both primary and secondary data for this study. Researcher use simple random sampling technique to select the sample.

Sample Size

For fulfilling the objectives of the study researchers randomly select 100 consumers from Particular Area.

4. Data Analysis and Discussion

One of the important steps is to analyze the data and discuss the findings. In this part researchers will discuss the empirical findings from this study. The data analysis mainly concerns primary data collected in the form of questionnaires distributed among Consumer.

Analysis

Variables	Particulars	Respondents	Percentage
Gender	Male	62	62
	Female	38	38
	Total	100	100
Age Category	less than 18	8	8
	18 to 30	74	74
	31 to 60	16	16
	61 and above	2	2
	Total	100	100
Occupation	Student	74	74
	Professional (Government/corporate)	19	19
	Self Employed / Business	7	7
	Total	100	100
Monthly Income	20, 000 or below	54	54
	21, 000 to 40, 000	22	22
	41, 000 to 60, 000	13	13
	61, 000 and above	11	11
	Total	100	100

- **Gender:** The majority of respondents (62%) are male, while 38% are female.
- **Age:** Most respondents (74%) fall within the 18-30 age group. A smaller proportion (16%) is between 31 and 60, with 8% being under 18 and 2% being 61 or older.
- **Occupation:** The largest group of respondents (74%) are students. Professionals (government or corporate) make up 19%, and self-employed individuals or business owners account for 7%.
- **Monthly income:** Over half of the respondents (54%) earn 20, 000 or less per month. The 21, 000-40, 000

income bracket comprises 22%, while 13% earn between 41, 000 and 60, 000. The highest income bracket (61, 000 or above) includes 11% of the respondents.

Variables	Particulars	Respondents	Percentage

	Very Good	14	14
	Total	100	100
Which digital channel influences you to buy more?	E Commerce Websites such as Amazon, Flipkart, Myntra, etc	83	83
	Social Media-Instagram, Facebook, etc	15	15
	Websites, Blogs or Emails	2	2
	Total	100	100
Have digital channels such as social media, advertisements altered your online purchase decisions?	Strongly Disagree	6	6
	Disagree	5	5
	Neutral	27	27
	Agree	37	37
	Strongly Agree	25	25
	Total	100	100

- High awareness of digital marketing: 93% of respondents are aware of the concept.
- Frequent online shopping: 39% shop regularly, while 60% shop during sales or festive seasons.
- High satisfaction with online shopping: 81% are either satisfied or highly satisfied with their experience.
- Influence of digital advertisements: 60% have bought something online after seeing an advertisement on social media.
- Preference for online shopping: 74% prefer online shopping over traditional shopping.
- Research before purchase: 81% research products before buying online.
- Trust in online information: 82% believe in the credibility of product information on blogs, websites, and reviews.
- Positive opinion on online information availability: 83% rate the availability of online information as good or very good.
- Dominance of e-commerce websites: 81% are influenced by e-commerce websites like Amazon, Flipkart, and Myntra.
- Impact of digital channels: 63% agree or strongly agree that digital channels have influenced their online purchase decisions.

Overall, the data suggests a high level of engagement with digital marketing and online shopping among respondents.

5. Conclusion

Digital marketing is super effective & really cost-friendly too! A company can soar to new heights when they use digital marketing the right way. To do this well, a business must understand how their customers like to shop. This research was done mainly to figure out how things like digital ads, social media, monthly income, blogs, & websites

affect what people buy. It focuses on shoppers who prefer online shopping instead of traditional stores. The rise of e-commerce platforms & digital channels really changes how people buy stuff.

The study shows that social media and online stores have a huge effect on what consumers choose to purchase. People tend to shop more on websites when there are offers, sales, or during festive seasons. Interestingly, customers trust the information they find online about products. They often check it out before deciding to buy something. Most shoppers are happy with their online shopping experience as well as the items they get from these platforms. This happiness often leads them to prefer online shopping over going to regular stores. Good ads, useful info, & promotions through social media, blogs, and websites can really help a company boost its sales.
